

THE WISDOM CORRIDOR PROJECT

HIGHLANDS ELEMENTARY SCHOOL

Overview

The Wisdom Corridor project has been an incredible space for our elementary students. They have developed important life skills and built meaningful relationships. Throughout the project, students have been exposed to a variety of valuable lessons that have helped them learn and grow as individuals. They have been able to explore different skills such as communication, empathy, problem-solving, and self-reflection, among others.

The project has also provided a platform for students to build strong bonds with their peers and teachers. Through various activities and discussions, students have been able to connect with each other on a deeper level, creating a sense of community and belonging.

The Wisdom Corridor project has proven to be an invaluable experience for the students, providing them with a safe and supportive environment to explore, learn, and grow. The skills and relationships developed through this project are likely to have a positive impact on the students' personal and academic lives long even after they leave elementary school.

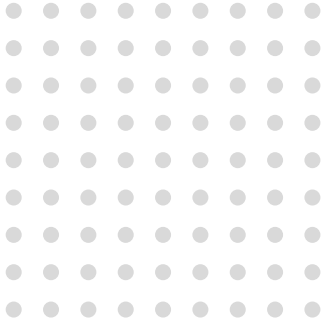

“What we loved”

"I enjoyed facilitating the project and building relationships with my students who participated. I loved how the activities and the project were very student led. Thank you for doing this :)"
