

THE WISDOM CORRIDOR PROJECT

PYDS LEARNING ACADEMY

Overview

When the PYDS founder, G. K. Swamy, noticed that underprivileged children in his rural community stood no chance of gaining employment next to their wealthier peers, he decided to do something about it. He began an after-school tutoring program to supplement the education of four local children. Cattle sheds and garages were their gilded halls of learning, in the beginning. The movement grew wings when, with the admirable support of many friends of the society, in the year 2008, the Society established a fully-equipped school.

PYDS LA believes that an enjoyable and meaningful education that is sensitive to the need of the hour is the right of every child. Through their free holistic education, day-long nutrition, complete health care, transportation, and hostel facilities, PYDS LA is successfully enhancing the lives of many underprivileged rural kids. Be it fostering their desire to learn or instilling values in those children, the school does it all. They look forward to creating responsible future leaders for the coming-of-age individual, social and global change.

Wisdom Gallery

“What we loved”

I feel this project is a fantastic idea. Like spirituality is connecting to the seed of creation inside us. This project provides the space to bring out the spiritual dimension in us by using a cognitive path in education which is greatly missing. This project is a spontaneous process. It should be the idea for Youth Leaders. We should cascade this project to our family, neighbors, and communities. The greatest thing in the world is human knowledge. It is never about who we are rather it is always about what we are. And this project lets us realize this factor in life.
